This is the diplomatic transcript provided by Bell/Skeat. The transcript of line 19 - 24 is provided by Gronewald 1987.

Letters with a dot below the line (doubtful letters) are displayed in **Red**. A single dot "." indicates one missing letter, [---] indicates missing letters, the number of which is unknown. Nomina Sacra are printed in **Bold**

Diplomatic transcript is generally defined as the "**guaranteed Text**". It shows no letter as read which cannot be guaranteed. (The guaranteed text below is represented by the **black** letters only!)

At this position Papyrus Köln 255 fits to the bottom of Papyrus Egerton 2, fragment 1. The exact fitting is difficult to obtain and the displayed fragment positions do not indicate the original locations within the complete sheet. One can see the diaeresis of the Y and a small portion of the A on the bottom part of the Egerton fragment.

At this position Papyrus Köln 255 fits to the bottom of Papyrus Egerton 2, fragment 1. The exact fitting is difficult to obtain and the displayed fragment positions do not indicate the original locations within the complete sheet. A little bit of the vertical bar of the P from line 42 can be seen on P. Köln.

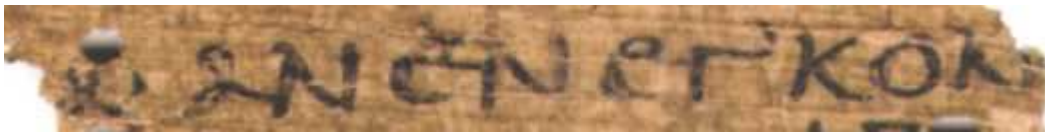

Line 43: ΔΕΑΥΤΩΟΙΗ . ΠΟΡΕ

A little bit of the horizontal bar of the Nomen Sacrum IH can be seen on Egerton

fragment 1.
